Free Democracy Summit April 23 - 25

Duluth, Minnesota, April 23rd - April 25th 2004

free democracy summit

celebration of art and music in activism conference on contemporary issues social and environmental justice from the grassroots

www.freedemocracysummit.org

art

It will be art that kicks off the Free Democracy Summit, on Friday night as bands and poets will be performing at musical venues all across Duluth. All weekend long, art will be one of the activities that binds everyone together. With politically charged art at galleries all across city, music and poets on street corners all day, and at bars and coffee shops at night. Creative and free expression of ideas through theater, spoken word, or any other method will be encouraged, as we come together to find new ways of working collectively to create a better world for everyone.

From music to street theater, from puppets to poems, the arts have played a vital role in activism. The arts energize, inspire, and unify - and the Free Democracy Summit will celebrate that role.

education

The Free Democracy Summit will feature presentations by a diverse group of organizations working on social and environmental justice issues. These presentations will often be over-lapping and take place at multiple venues in downtown Duluth. The organizations include the Institute for Agriculture and Trade Policy, Witness For Peace, the Minnesota Public Interest Research Group, Democracy Matters, the Resource Center for the America's, Institute for a Sustainable Future, and many more. They will be presenting through forums, workshops, panel discussions, and keynote addresses. These educational and interactive presentations will speak about the work that each organization does and the issues they tackle.

inspiration

Keynote speakers, Rallies, and a march lead by Granny "D", will serve as inspiration and energy, that along with the art and education, will fuel the people's desire to become involved and stay involved in a movement for a better world. The "Call to Consciousness Rally" will focus on the idea that a better world is possible, and that we need to realize that there are issues that tie all of our individual battles together. Granny "D" walked across the entire United States to fight for campaign finance reform, and she will lead us in a march for ten blocks symbolizing the ten miles a day she walked for 14 months, at the age of 89, to make our country a better place. Now at 93 she will march again with our support, and together we will help create a movement that is inclusive, fair, and dedicated to bettering everyone's lives.

The keynote speakers will help us come to the realization that there are threads that tie each of our issues together. By creating new allies and new bonds our effectiveness and efficiency will be forever improved.

By bringing together environmentalists, social justice advocates, farmers, labor organizations, human rights activists, politicians and people from a diverse array of backgrounds, an environment of opportunity will be created; opportunity for people to share the same space and to share their message and the history of their work. As members from each field of activism and civic work come together, the links that bind all of their efforts, the issues that rise above all of their individual struggles will have a chance to become clear, and new networks of cooperation can begin as old friendships strengthen.

Minnesota film-makers bring the struggle against corporate globalization home. Last November, thousands of Americans met in Miami to protest the Free Trade Area of the Americas. Standing up for democracy, the film tracks activist's experiences during the protest, and amazing footage unveils the brutal truth behind American life under the guns of foul repression.

****This is the debut showing with introductions by the filmmakers Erik Peterson and Howard Kling.**

Collecting five hundred interviews, from New York City to Los Angeles, film-maker Mark WoJahn traveled across the country by train asking Americans from every perspective, what does America need? "In essence, the movie is a declaration for the democratic ideal and the democratic necessity of talking and really listening to what people have to say. It is a State-of-the-Union address by everyday people whose viewpoints are rarely sought or heard in conventional media."

****Introduction by award winning Minneapolis based filmmaker Mark WoJahn.**
